REASONS FOR ALLOWANCE

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of a random number generation apparatus comprising: a random noise generator to receive physical noise and generate random noise in response; a random pulse wave generator for generating a waveshaped random pulse wave from the random noise; a binary pulse sequence converter for sampling the random pulse wave to a binary pulse sequence with a first clock; and a binary pulse sequence code smoothing circuit to un-reverse and reverse the polarity of the binary pulse sequence every half period of a second clock along with other features as seen in the independent claim 1.

The closest found prior art is Kogaku et al. (J.P. 2000-276330). Kogaku et al. disclose random number generation device comprising noise source and sampling circuit. However, Kogaku et al. fail to disclose either clearly or inherently in detail the random number generation apparatus as seen in above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
